Keep On Scanning

As most of you know, our district, along with many others, recently suffered an outbreak of computer virus attacks. We are up and running again, but the viruses keep popping up. Please keep your computers scanned—every day would be best. You do not need to put them in safe mode unless you find a virus. If you do get one please unplug the computer from the network immediately and run your virus protection at least two times in safe mode. When it comes up clean you may re-plug into the network, but please inform your campus technician that you did have a virus. If you need help with any of this just let your campus tech know. School objects is the best way to contact us, but we also take emails.
